GOMZI LIFE SCIENCE · PRIVATE LABEL EXCELLENCE

A CONSIDERED PARTNERSHIP

A Thoughtful Partner. At Every Step.

Great nutrition begins with a clear purpose. Great brands begin with the right manufacturing partner.

Based in the industrial manufacturing hub of Surat, India, **Gomzi Life Science LLP** brings together advanced nutraceutical manufacturing, cutting-edge formulation development, and bespoke private labelling to help entrepreneurs, established enterprises, and global distributors build market-leading nutrition brands.

From everyday sports performance and preventative wellness to specialized clinical dietary supplements, we place your vision at the center. Every formulation parameter, ingredient grade, batch size, and packaging configuration is calibrated around one uncompromising goal: producing finished products that feel unmistakably yours and command trust in international markets.

GUIDING PRINCIPLES

01 / MISSION

Excellence in every single detail.

To deliver nutritional products and contract services with uncompromising quality, rigorous compliance, and transparent integrity. We believe in continuous refinement from raw assay to finished formulation.

02 / VISION

A healthier world, built together.

To become a globally admired nutraceutical partner, bringing efficacious, premium, and affordable nutrition formulations to a wider global population through enduring commercial relationships.

03 / VALUE

Your trust. Our responsibility.

To place client collaboration at the very heart of contract manufacturing. We listen attentively to your market requirements, act with ethical clarity, and protect your brand equity with consistent quality.

TURNKEY BRAND ENABLEMENT

From Concept to Your Finished Label.

We specialize in 100% third-party and contract manufacturing, empowering clients to market proprietary formulations without managing complex factory infrastructure.

1

Formulation R&D

Active ingredient ratio balancing, flavour profiling, solubility optimization, and custom nutritional profile development tailored to your target consumer demographic.

2

Quality Sourcing

Certified raw material procurement with strict Certificate of Analysis (CoA) validation, active assay verification, and heavy metal screening for total peace of mind.

3

Packaging Architecture

Container selection (HDPE jars, blister packs, composite sachets, amber droppers), graphic label compliance, tamper-evident seals, and protective export barrier design.

4

Pilot Batch Testing

Pilot blend trials, organoleptic assessments, dissolution/disintegration testing, and real-time stability verification before full commercial run sign-off.

5

Cleanroom Production

High-speed automated blending, tableting, encapsulation, and filling in controlled cleanrooms adhering to stringent international hygiene protocols.

6

Global Export Logistics

Batch test certification, export documentation (Free Sale, Certificate of Origin, Legalization), palletization, and dispatch to maritime ports and air hubs.

Your Brand Equity, Defended by Process Excellence

Whether you are an established international sports brand seeking diversified supply lines or a modern direct-to-consumer founder entering the wellness sphere, our contract infrastructure provides low capital friction, flexible batch planning, and guaranteed formula confidentiality.

- ✓ Custom Flavours & Natural Sweeteners
- ✓ Strict Non-Disclosure & Recipe Security
- ✓ Full In-House Graphic & Label Support
- ✓ Competitive Best-in-Class Unit Economics

Flexible Minimum Order Quantities

Structured order volumes enable emerging brands to test market traction while offering scaled capacity for high-volume multinational container shipments.

Regulatory Dossier Support

Full documentary backing including ingredient breakdown, nutritional statements, allergen declarations, and stability reports for rapid import customs clearance.

COMPREHENSIVE DOSAGE CAPABILITIES

Supported Formats: Solid & Powder Systems

We engineer formulations across nine specialized delivery systems, ensuring optimal bioavailability, shelf stability, and superior consumer taste profiles.

Powders & Blends 01

Everyday & Performance Nutrition

High-uniformity blending for whey/plant protein, electrolytes, hydration salts, superfoods, and dietary fibers with instantized dispersion.

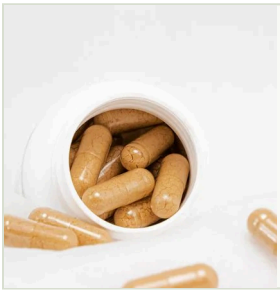

Whey Protein | Electrolytes

Tablets 02

Convenient Daily Formulations

High-precision rotary tablet compression with options for film-coating, enteric coating, chewable textures, and sustained-release matrices.

Hard & Soft Capsules 03

Simple. Precise. Adaptable.

Automated capsule filling supporting vegetarian HPMC or gelatin shells in sizes #00, #0, #1, and #2, as well as oil-filled softgel options.

HPMC Veg | Gelatin

Single-Serve Sachets 04

Thoughtfully Portioned Nutrition

Multi-layer barrier foil packaging ensuring total moisture/oxygen protection for sensitive pre/probiotics, hydration powders, and single-serve drinks.

Stick Packs | Probiotics

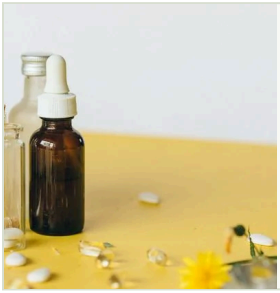

Precision Quality Control on Solid Formats

Every batch of tablets and capsules undergoes stringent hardness, friability, disintegration time, and active assay testing to ensure full pharmaceutical uniformity across millions of units.

LIQUID, CHEWABLE & EFFERVESCENT DELIVERY

Supported Formats: Specialty Systems

Modern consumers demand engaging nutritional rituals. Our liquid and effervescent processing capabilities provide refreshing, highly absorbable alternatives.

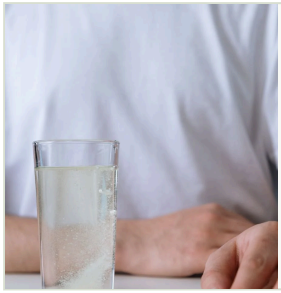

Syrups & Suspensions 05

Nutrition in Liquid Format

Homogenized liquid blending with premium flavour balancing for multivitamin tonics, iron syrups, herbal elixirs, and pediatric nutrition.

Multivitamins | Iron Tonics

Effervescent Tablets 06

Refreshing Dissolving Wellness

Dehumidified cleanroom compression preventing premature moisture reaction. Packaged in moisture-sealed tubes with desiccant caps.

Functional Gummies 07

An Enjoyable Daily Wellness Ritual

Pectin-based vegan and gelatin gummy manufacturing with custom moulds, natural fruit juices, and heat-resistant packaging.

Pectin Vegan | Biotin

Precision Liquid Drops 08

Small Format. High Potency.

Micro-dosed liquid actives in amber glass dropper bottles, ideal for fat-soluble vitamins (D3/K2), botanical extracts, and sublingual solutions.

VALUE-ADDED MANUFACTURING SERVICES

1. Formulation R&D

Micro-nutrient stability, bioavailability, and customized recipe design.

2. Packaging Design

Bottles, blisters, tubs, cartons, and moisture-barrier materials.

3. Quality Assurance

Comprehensive assay testing, microbial clearance, and CoA generation.

4. Regulatory Consultancy

Export dossier support and labeling compliance for overseas jurisdictions.

5. Market Analytics

Ingredient trend intelligence and high-growth formulation positioning.

6. Responsible Sourcing

Clean-label ingredients, ethically sourced botanicals, and zero fillers.

AUTHENTIC MANUFACTURING INFRASTRUCTURE

Behind the Label. Inside Our Facility.

A photographic look at the advanced equipment, cleanroom environments, analytical testing suites, and dedicated personnel powering your products.

01 / QUALITY CONTROL

Quality Assurance Inspection

Technician in cleanroom PPE conducting in-line equipment inspections and batch logging.

02 / STERILE OPERATIONS

Cleanroom Processing Facility

Specialized operator monitoring stainless steel processing tanks and automated valves.

03 / PACKAGING LINE

Automated Bottling Line

High-speed automated conveyor conveying white HDPE bottles through clean bottling rails.

04 / BULK PRODUCTION

Bulk Processing Vessels

Cleanroom operators inspecting industrial stainless formulation vessels and transfer lines.

05 / ANALYTICAL LAB

Precision Powder Formulation

R&D chemist weighing active nutritional powders on an analytical digital micro-balance.

06 / FORMULATION

Liquid Formulation Blending

Operators introducing liquid actives into stainless mixing units for uniform dispersion.

07 / ADVANCED VESSELS

Stainless Pressure Bioreactor

Cleanroom technician recording digital tablet telemetry beside pressure reaction vessels.

08 / R&D CORRIDOR

Analytical Testing Laboratory

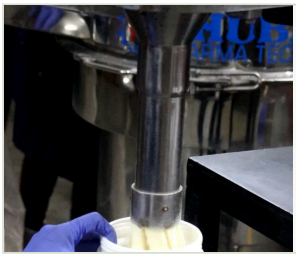

Modern laboratory corridor equipped with spectrophotometers and analytical testing equipment.

09 / FINISHING

Capped Bottle Packaging Line

Continuously running conveyor transporting capped dietary supplement bottles to induction sealers.

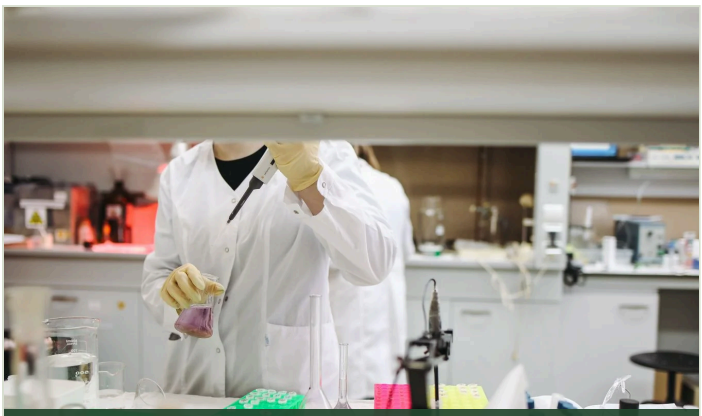

10 / POWDER FILLING

Auger Powder Filling

SCIENTIFIC RIGOUR & VERIFICATION

Care in the Process. Confidence in the Product.

What goes into a nutritional product matters just as much as the brand label upon it. Our multi-tiered quality assurance protocols protect brand integrity at every stage.

IT STARTS WITH A QUESTION. **It Grows with Good Science.**

01 / Raw Material Quarantine & Assay

Every incoming botanical, amino acid, and vitamin lot is quarantined until identity, purity, potency, moisture, and microbial compliance are chemically certified.

02 / Environmental Cleanroom Controls

HEPA-filtered air handling, positive air pressure differentials, temperature, and relative humidity regulation ensure zero cross-contamination.

03 / In-Process Variance Mitigation

Dedicated QA auditors conduct regular weight variation, disintegration, blend uniformity, and torque checks throughout active production shifts.

04 / Full Batch Traceability & CoA

Every commercial batch is linked to complete batch production records (BPR), retention samples, and comprehensive Certificates of Analysis.

THE GOMZI ADVANTAGE

01. 100% turnkey third-party & private label manufacturing partner.

02. In-house formulation R&D for bespoke recipe creation.

03. Strict compliance with international GMP and ISO protocols.

04. Comprehensive assay, heavy metal & microbial testing.

05. Time-bound production scheduling & rapid turnaround.

06. Modern high-speed tablet, capsule, and powder lines.

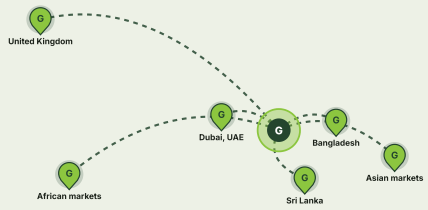

07. Full packaging, labeling, and graphic support.

08. Complete export documentation for global port clearance.

EXPANDING WORLDWIDE FOOTPRINT

Rooted in India. Open to the World.

Strategically located near India's major western deep-water ports, Gomzi Life Science LLP bridges manufacturing excellence with robust global export logistics.

Origin Hub: Surat, Gujarat, India (Hazira & Nhava Sheva port connectivity)

6 Major International Export Corridors

ACTIVE EXPORT DESTINATIONS

United Kingdom & Europe

Private label contract manufacturing for sports, daily nutrition and lifestyle wellness brands in the UK.

African Markets

Supplying high-demand protein powders, essential vitamin supplements and therapeutic formulations.

Dubai, UAE & Middle East

Strategic hub connections for premium nutraceuticals, halal-compliant capsules, and health drinks.

Sri Lanka

Bilateral nutritional trade partnerships delivering tablets, syrups, and packaged sachet blends.

Bangladesh

Contract formulations for dietary supplements, health drinks, and everyday family wellness ranges.

Asia Pacific Markets

Broad commercial reach across Southeast Asia with specialized gummy, sachet, and effervescent formats.

RECOGNIZED INDUSTRY BENCHMARKS

Quality Deserves Clear Documentation.

Operating in accordance with world-class regulatory standards. Our facility benchmarks and certified quality protocols assure seamless market entry across international borders.
